

UW-03

Gen 3.0 Wash & Cure Machine

 More
Space-efficient

 31%
Stronger Vortex

 360°
Curing with
Anti-roll Turntable

Mighty Vortex, Thorough Cleaning

A 500r/min magnetic impeller stirs up a 31% faster vortex. Easy to rinse off stubborn resin residues.

Square Curing Space, Big & Efficient

10.64L (215*165*300mm) curing space, 13.7% larger. The square turntable can handle larger and more 3D prints.

New Anti-roll Curing Turntable

The turntable has a perimeter curb and four extra weight-bearing ball casters. So, the prints on it won't roll off.

360° Curing with Intense UV Light

Upgrade to 18 powerful 405nm UV LEDs. As the turntable spins, the model surface gets cured solidly and evenly.

More Ways of Wash & Cure

Both wash and cure can be done in the basket. It also supports hang-state wash and on-turnstile cure.

Multiple Precautions for Safety

The curing process will pause if the anti-UV lid is opened accidentally. No hazards from the working UV light or turntable.

Physical Buttons for Easy Control

Speed and timer for wash/cure can be set quickly according to resin types and model complexity.

Product Dimensions	325*303*436mm	Speed Modes	Fast/Normal
Package Dimensions	378*346*507mm	Control Mode	Physical Buttons
Net Weight	5.4kg	Enclosure	Fully Enclosed
Gross Weight	7.5kg	Container Material	PP
Wash Volume	210*160*200mm (6.72L)	Basket Material	Stainless Steel
Cure Volume	215*165*300mm (10.64L)	Input Voltage	100V-240V
UV Wavelength	405nm	Output Voltage	DC 24V
UV LED	18 UV LEDs	Rated Power	60W
Timer Setting	5-30min	UI Languages	English/中文
